of expanded polytetrafluoroethylene film. Applicant has spent a considerable amount of money and time in the research, development and reduction to practice of such a filtration bag in anticipation of consumer need and a potentially vast commercial market and believes it is entitled to such claims. In fact, in support of applicant's claim that the subject bag is not obvious, applicant has just recently become aware of a competitor who has introduced a filtration bag purportedly made from a layer of expanded polytetrafluoroethylene. The introduction of the competitor filtration bag supports applicant's claim for non-obviousness because it reflects applicant's claim as to the consumer's need and interest in such a filtration bag. Applicant submits that if such a bag were obvious based upon the prior art or otherwise it would have been invented heretofore. As such, applicant would like to present its argument for non-obviousness as previously submitted and on the new grounds discussed herein.
